

ESD WORKSTATIONS

SAFE | ERGONOMIC | EFFICIENT

Professional solutions for EPA environments - designed for electronics assembly, productions, service and laboratories.

IEC 61340-5-1

ESD
CENTER

BUILD A COMPLETE WORKSTATION

We offer complete and ergonomic workstations for ESD-protected environments (EPA), providing everything needed to create a safe and functional workspace. Our range includes ESD workbenches, chairs, mats, lighting, trolleys, grounding equipment, and various accessories. Together, these products create a well-designed workstation that helps minimize the risk of ESD damage and meets the requirements of IEC 61340-5-1.

WORKTABLES

ESD Center's worktables are designed for ESD-protected work environments, where it is important to minimize the risk of electrostatic discharges that could damage sensitive electronic components. The worktables are available in several configurations, including fixed-height, manually height-adjustable, and electrically height-adjustable models. The work surfaces can be equipped with ESD laminate or an ESD-safe mat, and a wide range of accessories is available to adapt the workstation to different requirements.

- 1600x800mm motorized tables standard from stock
- Available in 1200, 1600 & 2000mm as standard
- Available in 200kg & 300kg workload as standard
- Custom design on request
- Accessories in dissipative ESD coating
- Electrically adjustable with double motors
- Height adjustable from 700mm to 1150mm
- Manufactured in Scandinavia
- Company branding on request

TROLLEYS

Our ESD trolleys are designed for the safe and flexible transport and storage of sensitive electronic components and equipment in ESD-protected environments. The range includes various models and sizes, with different numbers of shelves and configurations to meet different requirements. The trolleys are designed to safely dissipate static electricity and help provide reliable ESD protection during production, storage, handling, and transportation within EPA areas.

- A wide range of trolleys available from stock
- Available in various models and sizes
- Custom designed trolleys
- Manufactured in Scandinavia

CHAIRS

ESD chairs are designed for work environments where sensitive electronics, circuit boards, and other ESD-sensitive components are handled. The chairs combine ESD-safe properties with ergonomic comfort, helping create a safe and productive workstation. Unlike standard chairs, ESD chairs are constructed using conductive or dissipative materials throughout the structure—including the seat, backrest, frame, and wheels. This allows static electricity to be effectively dissipated to the floor and ground, helping keep both the operator and equipment at the same safe electrical potential.

- Wide range of ESD chairs
- Available in economy, comfort and premium class to fulfill all requirements
- Available in colors blue, black and grey
- Asynchronous mechanism plus seat and dynamic back rest mechanism available
- Various heights
- Armrest and footrings accessories
- Clean Room

1**Choose you table**

Fixed, manually or electrically adjustable tables

**2****Add functionally**

Shelves, tool panels, energy panels, lighting and more accesories

**3****Add your chair**

Ergonomic ESD-seating adapted to your working position

**4****Add mobility**

ESD trolleys and mobile sotrage for components and tools
