

ZESTRON Easy Bath Control Kit

Test kit for manual concentration measurement

ZESTRON® Easy Bath Control Kit is a simple-to-use process that allows the user to monitor the cleaning agent concentration both at the process implementation and at any given point thereafter.

Concentration fluctuations caused by “drag-out” and other dilution effects can therefore become easily monitored thus ensuring reliable cleaning results.

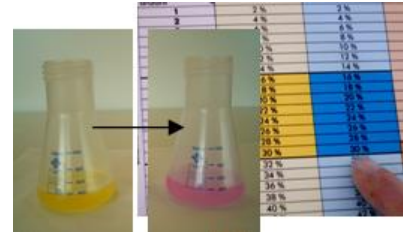

Simple test procedure in a few steps:

1) Sampling

2) Add indicator

3) Analysis

Advantages of ZESTRON® Easy Bath Control Kit compared to other test methods:

- Quick and easy measurement method to define the cleaning agent concentration in the cleaning bath.
- No special test equipment necessary, therefore
 - » no space requirements
 - » no investment costs
 - » mobile, for use anywhere
- Low costs per test
- Free of insalubrious toxic chemicals

Specifically developed for the following cleaning agents:

VIGON® A 200	VIGON® A 250	VIGON® US	ATRON® SP 200	ATRON® SP 400
VIGON® A 201	VIGON® A 300	ATRON® AC 205	ATRON® SP 300	

The ZESTRON® Easy Bath Control Kit includes:

- (1) 100 ml ZESTRON® Easy Bath Control – Indicator (up to 200 measurements)
- (2) DI-water bottle
- (3) 1x Erlenmeyer flask for measurement
- (4) 1x Sampling beaker for taking a sample
- (5) 3x Sampling syringes
- (6) Vinyl gloves (2 pair)
- (7) Instructions for use, including the correlation charts (not pictured)
